FUNCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation. SUBUNIT: Associates with p5-6 membrane protein. SUBCELLULAR LOCATION: Type I membrane protein. SIMILARITY: Contains 3 immunoglobulin-like C2-type domains. SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 348:411-418(1990).

Submitted (FBB-1997) to the EMBL/GenBank/DDBJ databases.
Submitted (FBB-1997) to the EMBL/GenBank/DDBJ databases.
I antigen/T-cell FUNCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation.
I SUBUNIT: Associates with p56-lck (By similarity).
I SUBCELIJULAR LOCATION: Type I membrane protein.
I SUBCELIJULAR LOCATION: Type I membrane protein.
I SUBCELIJULAR LOCATION: Type I membrane protein.
I SIMILARITY: Contains 3 immunoglobulin-like V-type domains.
I SIMILARITY: Contains 1 immunoglobulin-like V-type domains.

                                                                                                                                                                                            SEQUENCE
                                                           mitted (FEB-1997) to the EMBL/GenBank/DDBJ databases.

MINCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation.

SUBCUNIT: Associates with p56-lck (By similarity).

SUBCLLULAR LOCATION: Type I membrane protein.

SUBCLLULAR LOCATION: Type I membrane protein.

SIMILARITY: Contains 3 immunoglobulin-like C2-type domains.

SIMILARITY: Contains 1 immunoglobulin-like V-type domain.

May regulate T-cell activation.
--- SUBUNIT: Associates with p56-Lck (By similarity).
---- SUBCELLULAR LOCATION: Type I membrane protein.
---- SIMILARITY: Contains 3 immunoglobulin-like C2-type domains.
----- SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Macaca nemestrina (Pig-tailed Eukaryota; Metazoa; Chordata; Eukaria; Primates; Mammalia; Eutheria; Primates; Cercopithecinae; Macaca.
